REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art neither discloses nor makes obvious an inflatable product including an inflatable body having a socket built in the inflatable body, and a pump connected to the socket and having a body which is wholly or partially located in the socket. The Decision on Appeal rejected the requirement that an inflatable body be substantially sealed. Inflatable therefore is defined as expanding when filled with gas. The Decision on Appeal reversed the rejections with respect to Wortman and Higgs because the inflatable beds in these references include other structures and because in these mattresses the entire bed does not expand. As detailed in the Decision the inflatable bodies in Wortman would be the air cells 44 and 46 and in Higgs would be the plenum 28 because with these elements the entire body expands when filled with gas. After further review of the prior art with a consideration of this interpretation of an inflatable body the examiner found the Adams, III (USPN 4,862,533) inflatable mattress which is the closest prior art. In Adams, III there is an inflatable body (36) a socket (48, Fig. 12) and a pump having a body (124, 126 Fig. 13) the pump body is connected indirectly to the socket by tube (120) but is not wholly or partially within the socket. Thus the prior art neither discloses nor makes obvious an inflatable product including an inflatable body, a socket and a pump as claimed having the pump body wholly or partially located in the socket.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
